**Duality Theories for Boolean Algebras with Operators (Springer Monographs in Mathematics)** Steven Givant

In this new text, Steven Givant—the author of several acclaimed books, including works co-authored with Paul Halmos and Alfred Tarski—develops three theories of duality for Boolean algebras with operators. Givant addresses the two most recognized dualities (one algebraic and the other topological) and introduces a third duality, best understood as a hybrid of the first two. This text will be of interest to graduate students and researchers in the fields of mathematics, computer science, logic, and philosophy who are interested in exploring special or general classes of Boolean algebras with operators. Readers should be familiar with the basic arithmetic and theory of Boolean algebras, as well as the fundamentals of point-set topology.

### **From reader reviews:**

#### **Christen Arnold:**

Throughout other case, little persons like to read book Duality Theories for Boolean Algebras with Operators (Springer Monographs in Mathematics). You can choose the best book if you love reading a book. Providing we know about how is important the book Duality Theories for Boolean Algebras with Operators (Springer Monographs in Mathematics). You can add know-how and of course you can around the world with a book. Absolutely right, simply because from book you can understand everything! From your country until finally foreign or abroad you will end up known. About simple thing until wonderful thing you may know that. In this era, we can easily open a book or maybe searching by internet unit. It is called e-book. You can use it when you feel weary to go to the library. Let's study.

#### **Jennifer Nava:**

The book Duality Theories for Boolean Algebras with Operators (Springer Monographs in Mathematics) has a lot of information on it. So when you make sure to read this book you can get a lot of help. The book was compiled by the very famous author. The author makes some research just before write this book. This kind of book very easy to read you can obtain the point easily after perusing this book.

#### **Adam Youngblood:**

Are you kind of active person, only have 10 or 15 minute in your moment to upgrading your mind proficiency or thinking skill perhaps analytical thinking? Then you are experiencing problem with the book compared to can satisfy your short time to read it because this time you only find e-book that need more time to be learn. Duality Theories for Boolean Algebras with Operators (Springer Monographs in Mathematics) can be your answer since it can be read by an individual who have those short time problems.

#### **Pearl Dyson:**

Is it you who having spare time and then spend it whole day by watching television programs or just lying on the bed? Do you need something new? This Duality Theories for Boolean Algebras with Operators (Springer Monographs in Mathematics) can be the solution, oh how comes? A fresh book you know. You are and so out of date, spending your extra time by reading in this brand-new era is common not a nerd activity. So what these guides have than the others?
