What is the key to the truth and power of science? Would a theory of everything disprove the soul? Is matter all there is? Can I keep science and my common sense? Can we travel back in time? Is it evolution or creation or ...? Will scientists ever make a man? Will we ever create artificial intelligence? If so, what does that say about my worth? What is the ultimate source of our intellectual malaise? Anthony Rizzi, a distinguished physicist, answers these questions and more. "What a terrific book!!!...The time is now. Philosophers, scientists, and the educated reader will profit enormously from this book." -Ralph McInerny, University of Notre Dame philosophy professor, Gifford Lecturer "There is a pressing need for Anthony Rizzi's book, which reveals the link between science and man's deepest questions in a bold, clear and truthful way. His book is full of insights that readers will relish and want to read again and again to plumb their depths." -Marcus Grodi, host of The Journey Home, EWTN "The Science Before Science ...provides much needed perspective." -Joseph Martin, Chief Scientist, Planetary Science Lab (retired), Lockheed Martin
