Transformations of Warfare in the Contemporary World (Politics History & Social Chan) David Jacobson

Today's warfare has moved away from being an event between massed national populations and toward small numbers of combatants using high-tech weaponry. The editors of and contributors to the timely collection *Transformations of Warfare in the Contemporary World* show that this shift reflects changes in the technological, strategic, ideological, and ethical realms.

The essays in this volume discuss:

- the waning connection between citizenship and soldiering;
- the shift toward more reconstructive than destructive activities by militaries;
- the ethics of irregular or asymmetrical warfare;
- the role of novel techniques of identification in military settings;
- the stress on precision associated with targeted killings and kidnappings;
- the uses of the social sciences in contemporary warfare.

In his concluding remarks, David Jacobson explores the extent to which the contemporary transformation of warfare is a product of a shift in the character of the combatants themselves.

Contributors include: Ariel Colonomos, Roberto J. González, Travis R. Hall, Saskia Hooiveld, Rob Johnson, Colonel C. Anthony Pfaff, Ian Roxborough, and the editors
