Bandwidth Extension of Speech using Perceptual Criteria (Synthesis Lectures on Algorithms and Software in Engineering) Visar Berisha, Steven Sandoval, Julie Liss

Bandwidth extension of speech is used in the International Telecommunication Union G.729.1 standard in which the narrowband bitstream is combined with quantized high-band parameters. Although this system produces high-quality wideband speech, the additional bits used to represent the high band can be further reduced. In addition to the algorithm used in the G.729.1 standard, bandwidth extension methods based on spectrum prediction have also been proposed. Although these algorithms do not require additional bits, they perform poorly when the correlation between the low and the high band is weak. In this book, two wideband speech coding algorithms that rely on bandwidth extension are developed. The algorithms operate as wrappers around existing narrowband compression schemes. More specifically, in these algorithms, the low band is encoded using an existing toll-quality narrowband system, whereas the high band is generated using the proposed extension techniques. The first method relies only on transmitted high-band information to generate the wideband speech. The second algorithm uses a constrained minimum mean square error estimator that combines transmitted high-band envelope information with a predictive scheme driven by narrowband features. Both algorithms make use of novel perceptual models based on loudness that determine optimum quantization strategies for wideband recovery and synthesis. Objective and subjective evaluations reveal that the proposed system performs at a lower average bit rate while improving speech quality when compared to other similar algorithms.

From reader reviews:

James Jean:

Now a day those who Living in the era everywhere everything reachable by match the internet and the resources in it can be true or not involve people to be aware of each information they get. How many people to be smart in having any information nowadays? Of course the answer then is reading a book. Reading a book can help persons out of this uncertainty Information specially this Bandwidth Extension of Speech using Perceptual Criteria (Synthesis Lectures on Algorithms and Software in Engineering) book as this book offers you rich info and knowledge. Of course the knowledge in this book hundred percent guarantees there is no doubt in it you probably know this.

Melissa Parra:

The actual book Bandwidth Extension of Speech using Perceptual Criteria (Synthesis Lectures on Algorithms and Software in Engineering) will bring one to the new experience of reading a book. The author style to explain the idea is very unique. Should you try to find new book you just read, this book very suited to you. The book Bandwidth Extension of Speech using Perceptual Criteria (Synthesis Lectures on Algorithms and Software in Engineering) is much recommended to you to read. You can also get the e-book from your official web site, so you can easier to read the book.

Robert Cobb:

What is your hobby? Have you heard that will question when you got learners? We believe that that issue was given by teacher to the students. Many kinds of hobby, Every individual has different hobby. And also you know that little person including reading or as studying become their hobby. You should know that reading is very important along with book as to be the matter. Book is important thing to include you knowledge, except your teacher or lecturer. You discover good news or update in relation to something by book. Amount types of books that can you go onto be your object. One of them are these claims Bandwidth Extension of Speech using Perceptual Criteria (Synthesis Lectures on Algorithms and Software in Engineering).

Faye Michaels:

Many people said that they feel fed up when they reading a e-book. They are directly felt this when they get a half portions of the book. You can choose typically the book Bandwidth Extension of Speech using Perceptual Criteria (Synthesis Lectures on Algorithms and Software in Engineering) to make your current reading is interesting. Your own personal skill of reading talent is developing when you just like reading. Try to choose easy book to make you enjoy to see it and mingle the sensation about book and examining especially. It is to be initial opinion for you to like to start a book and learn it. Beside that the guide Bandwidth Extension of Speech using Perceptual Criteria (Synthesis Lectures on Algorithms and Software in Engineering) can to be your brand new friend when you're truly feel alone and confuse in what must you're

doing of this time.
