Mahale Chimpanzees: 50 Years of Research

Long-term ecological research studies are rare and invaluable resources, particularly when they are as thoroughly documented as the Mahale Mountain Chimpanzee Project in Tanzania. Directed by Toshisada Nishida from 1965 until 2011, the project continues to yield new and fascinating findings about our closest neighbour species. In a fitting tribute to Nishida's contribution to science, this book brings together fifty years of research into one encyclopaedic volume. Alongside previously unpublished data, the editors include new translations of Japanese writings throughout the book to bring previously inaccessible work to non-Japanese speakers. The history and ecology of the site, chimpanzee behaviour and biology, and ecological management are all addressed through firsthand accounts by Mahale researchers. The authors highlight long-term changes in behaviour, where possible, and draw comparisons with other chimpanzee sites across Africa to provide an integrative view of chimpanzee research today.

As a university student exactly feel bored to reading. If their teacher inquired them to go to the library or to make summary for some guide, they are complained. Just minor students that has reading's internal or real their interest. They just do what the instructor want, like asked to the library. They go to right now there but nothing reading critically. Any students feel that studying is not important, boring and also can't see colorful pics on there. Yeah, it is to become complicated. Book is very important for yourself. As we know that on this time, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore this Mahale Chimpanzees: 50 Years of Research can make you feel more interested to read.
