This book is a collection of stories from all over the world. I developed its content specifically to boost the development of children's brain by triggering the power of imagination through sentences which are rich with colorful imagery and imagination. I believe that telling a story to a child is different from reading a book story aloud. This is why the scripts of these stories are re-written to serve as a story telling. As a parent, teacher, or educator you only need to read the text aloud and it will come across as if you are telling a story rather than reading a book. Yet it is a very engaging and entertaining book to read. These stories are written by cultures all over the world, and then refined by generations down to generations of story telling. They are full of life experiences, wise advice, and priceless lessons. This was the main vehicle cultures all over the world helped their youngsters learn more about their grandfathers and great grandfathers accumulative experiences. In spite of the fact that the scripts of these stories were written with a scientific and academic purpose in mind, they are very entertaining. Your children will keep asking for more snuggle time with you while listening to the stories in this book. This is story telling at its finest.
