L-Functions and Galois Representations (London Mathematical Society Lecture Note Series)

L-Functions and Galois Representations (London Mathematical Society Lecture Note Series)

L-Functions and Galois Representations (London Mathematical Society Lecture Note Series)
This collection of survey and research articles brings together topics at the forefront of the theory of L-functions and Galois representations. Highlighting important progress in areas such as the local Langlands programme, automorphic forms and Selmer groups, this timely volume treats some of the most exciting recent developments in the field. Included are survey articles from Khare on Serre's conjecture, Yafaev on the André-Oort conjecture, Emerton on his theory of Jacquet functors, Venjakob on non-commutative Iwasawa theory and Vigneras on mod p representations of GL(2) over p-adic fields. There are also research articles by: Böckle, Buzzard, Cornut and Vatsal, Diamond, Hida, Kurihara and R. Pollack, Kisin, Neková?, and Bertolini, Darmon and Dasgupta. Presenting the very latest research on L-functions and Galois representations, this volume is indispensable for researchers in algebraic number theory.

From reader reviews:

Cornelius Callaghan:

Why don't make it to become your habit? Right now, try to ready your time to do the important action, like looking for your favorite book and reading a e-book. Beside you can solve your condition; you can add your knowledge by the guide entitled L-Functions and Galois Representations (London Mathematical Society Lecture Note Series). Try to stumble through book L-Functions and Galois Representations (London Mathematical Society Lecture Note Series) as your buddy. It means that it can to become your friend when you experience alone and beside those of course make you smarter than previously. Yeah, it is very fortuned in your case. The book makes you considerably more confidence because you can know anything by the book. So , we should make new experience in addition to knowledge with this book.

Jennifer Crowe:

Now a day individuals who Living in the era exactly where everything reachable by match the internet and the resources in it can be true or not call for people to be aware of each facts they get. How many people to be smart in having any information nowadays? Of course the correct answer is reading a book. Looking at a book can help individuals out of this uncertainty Information particularly this L-Functions and Galois Representations (London Mathematical Society Lecture Note Series) book as this book offers you rich data and knowledge. Of course the details in this book hundred pct guarantees there is no doubt in it you probably know this.

Terry McConnell:

The particular book L-Functions and Galois Representations (London Mathematical Society Lecture Note Series) has a lot associated with on it. So when you check out this book you can get a lot of help. The book was published by the very famous author. This articles author makes some research ahead of write this book. This particular book very easy to read you can find the point easily after reading this article book.

Doris Whobrey:

People live in this new morning of lifestyle always try to and must have the free time or they will get lot of stress from both lifestyle and work. So , if we ask do people have free time, we will say absolutely without a doubt. People is human not really a robot. Then we consult again, what kind of activity do you have when the spare time coming to anyone of course your answer will unlimited right. Then do you ever try this one, reading ebooks. It can be your alternative inside spending your spare time, typically the book you have read is usually L-Functions and Galois Representations (London Mathematical Society Lecture Note Series).
