Programming in Haskell

Graham Hutton

Programming in Haskell Graham Hutton

Haskell is one of the leading languages for teaching functional programming, enabling students to write simpler and cleaner code, and to learn how to structure and reason about programs. This introduction is ideal for beginners: it requires no previous programming experience and all concepts are explained from first principles via carefully chosen examples. Each chapter includes exercises that range from the straightforward to extended projects, plus suggestions for further reading on more advanced topics. The author is a leading Haskell researcher and instructor, well-known for his teaching skills. The presentation is clear and simple, and benefits from having been refined and class-tested over several years. The result is a text that can be used with courses, or for self-learning. Features include freely accessible Powerpoint slides for each chapter, solutions to exercises and examination questions (with solutions) available to instructors, and a downloadable code that's fully compliant with the latest Haskell release.

From reader reviews:

William Davis:

Reading a publication can be one of a lot of exercise that everyone in the world enjoys. Do you like reading book so. There are a lot of reasons why people love it. First reading a e-book will give you a lot of new information. When you read a book you will get new information since book is one of various ways to share the information or their idea. Second, looking at a book will make an individual more imaginative. When you reading through a book especially fictional works book the author will bring one to imagine the story how the character types do it anything. Third, it is possible to share your knowledge to other people. When you read this Programming in Haskell, you can tells your family, friends along with soon about yours e-book. Your knowledge can inspire others, make them reading a e-book.

Joel Kiser:

A lot of people always spent their own free time to vacation as well as go to the outside with them family members or their friend. Do you realize? Many a lot of people spent they free time just watching TV, or even playing video games all day long. If you would like try to find a new activity that is look different you can read a new book. It is really fun for you personally. If you enjoy the book that you simply read you can spent all day long to reading a guide. The book Programming in Haskell it is extremely good to read. There are a lot of people that recommended this book. These people were enjoying reading this book. In case you did not have enough space to bring this book you can buy the actual e-book. You can m0ore simply to read this book from the smart phone. The price is not to cover but this book has high quality.

Mary Fox:

Are you kind of occupied person, only have 10 or maybe 15 minute in your time to upgrading your mind ability or thinking skill possibly analytical thinking? Then you are having problem with the book when compared with can satisfy your limited time to read it because this time you only find e-book that need more time to be go through. Programming in Haskell can be your answer since it can be read by anyone who have those short spare time problems.

Michael Velez:

Reading a book to get new life style in this year; every people loves to go through a book. When you read a book you can get a lots of benefit. When you read publications, you can improve your knowledge, simply because book has a lot of information into it. The information that you will get depend on what types of book that you have read. If you wish to get information about your study, you can read education books, but if you act like you want to entertain yourself read a fiction books, this kind of us novel, comics, in addition to soon. The Programming in Haskell offer you a new experience in reading a book.
