Systems Analysis and Design Alan Dennis
Put SAD into action!

You can't truly understand Systems Analysis and Design (SAD) by only reading about it; you have to do it. In Systems Analysis and Design, Third Edition, Dennis, Wixom, and Roth offer a hands-on approach to actually doing SAD. Building on their experience as professional systems analysts and award-winning teachers, these three authors capture the experience of actually developing and analyzing systems. They focus on the core set of skills that all analysts must possess--from gathering requirements and modeling business needs, to creating blueprints for how the system should be built.

Features
* New and expanded coverage, including expanded coverage of functional and nonfunctional requirements; new event-action lists; a new extended example of process modeling and data modeling; expanded discussion of the use and interpretation of the weighted alternative matrix as well as RFPs, RFI, and RFQs; a new emphasis on the Migration Plan; and new coverage of business contingency planning during implementation.
* Focus on doing SAD. After presenting the how and what of each major technique, the text guides you through practice problems and invites you to use the technique in a project.
* Project-based approach. Topics are presented in the order in which an analyst would encounter them in a typical project.
* Real-life examples include a running case, which serves as a template that you can apply to your own work, and Concepts in Action examples that describe how real companies succeeded (and failed) in performing SAD activities.
* Object-oriented concepts and techniques are included throughout the book, and a final chapter focuses on the major elements of UML. Coverage is updated to reflect the innovations of UML Version 2.0.
* Student Website includes hands-on exercises, templates for project deliverables, PowerPoint slides, and relevant Internet links.

Jean Gaskin:

As a university student exactly feel bored to help reading. If their teacher inquired them to go to the library or to make summary for some guide, they are complained. Just small students that has reading's heart or real their interest. They just do what the instructor want, like asked to the library. They go to at this time there but nothing reading seriously. Any students feel that reading is not important, boring and also can't see colorful pictures on there. Yeah, it is to become complicated. Book is very important in your case. As we know that on this period, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore this Systems Analysis and Design can make you really feel more interested to read.
