Psychotherapy of the Brain-Injured Patient: Reclaiming the Shattered Self (Norton Professional Book)

Laurence Miller Ph. D.

Integrating neuropsychodynamic and biopsychosocial factors, this book provides a guide for psychotherapists whose practices may include patients with traumatic brain injury and related neurobehavioural syndromes, such as strokes and brain tumours.

It deals not only with traditional aspects of therapy with these challenging patients, but also with special problems that may arise, including aggression and impulsivity, alcohol and drug abuse, chronic pain, sex and relationships, and vocational and forensic issues.
