Modelling of Natural Dialogues in the Context of Speech-based Information and Control Systems (Dissertations in Database and Information Systems / ... Zu Datenbanken Und Informationssystemen)

M.M. Berg

Current spoken dialogue systems are often criticized because they lack natural behavior. At the same time, the development of natural dialogues is still an expensive and laborious process. Hence, many dialogues are very rigid, as they don't allow the user to influence the dialogue flow, and they use a static phrasing. Our aim is to facilitate the development of more natural speech-based information and control dialogues.

Consequently, in this publication, a machine-processable model is presented that combines the description of the information demand, communication with the back-end, and the style of the utterance. This dialogue model provides a foundation for generating system questions in different formulations and for realizing a close connection between questions, their possible answers and the corresponding language understanding modules. Moreover, the use of an abstract question description and dialogue metadata frees the developer from defining grammars and interpretation modules, while a natural language generation approach that includes politeness and formality variations saves the developer from manually defining prompts in different formulations. A Java-based dialogue engine is implemented that executes the model. It is shown that this XML-based dialogue model provides an easy way to create natural information-seeking dialogues and that it can be run within the implemented dialogue engine.

From reader reviews:

Angela Dreiling:

Now a day individuals who Living in the era just where everything reachable by connect to the internet and the resources inside can be true or not require people to be aware of each data they get. How individuals to be smart in acquiring any information nowadays? Of course the solution is reading a book. Reading through a book can help individuals out of this uncertainty Information especially this Modelling of Natural Dialogues in the Context of Speech-based Information and Control Systems (Dissertations in Database and Information Systems / ... Zu Datenbanken Und Informationssystemen) book as this book offers you rich data and knowledge. Of course the details in this book hundred pct guarantees there is no doubt in it you know.

Tyler Woodley:

This book untitled Modelling of Natural Dialogues in the Context of Speech-based Information and Control Systems (Dissertations in Database and Information Systems / ... Zu Datenbanken Und Informationssystemen) to be one of several books this best seller in this year, that's because when you read this guide you can get a lot of benefit in it. You will easily to buy this specific book in the book retailer or you can order it by way of online. The publisher in this book sells the e-book too. It makes you easier to read this book, since you can read this book in your Smartphone. So there is no reason to your account to past this guide from your list.

Willie Randolph:

A lot of people always spent their very own free time to vacation as well as go to the outside with them loved ones or their friend. Did you know? Many a lot of people spent these people free time just watching TV, or playing video games all day long. If you need to try to find a new activity that's look different you can read any book. It is really fun for yourself. If you enjoy the book that you simply read you can spent the whole day to reading a e-book. The book Modelling of Natural Dialogues in the Context of Speech-based Information and Control Systems (Dissertations in Database and Information Systems / ... Zu Datenbanken Und Informationssystemen) it is extremely good to read. There are a lot of those who recommended this book. These folks were enjoying reading this book. If you did not have enough space to bring this book you can buy the e-book. You can m0ore easily to read this book from your smart phone. The price is not to fund but this book provides high quality.

Maria Couch:

Reading can called head hangout, why? Because if you are reading a book mainly book entitled Modelling of Natural Dialogues in the Context of Speech-based Information and Control Systems (Dissertations in Database and Information Systems / ... Zu Datenbanken Und Informationssystemen) your head will drift away trough every dimension, wandering in each aspect that maybe mysterious for but surely will end up

your mind friends. Imaging every single word written in a guide then become one type conclusion and explanation this maybe you never get ahead of. The Modelling of Natural Dialogues in the Context of Speech-based Information and Control Systems (Dissertations in Database and Information Systems / ... Zu Datenbanken Und Informationssystemen) giving you yet another experience more than blown away the mind but also giving you useful data for your better life within this era. So now let us demonstrate the relaxing pattern the following is your body and mind is going to be pleased when you are finished looking at it, like winning a game. Do you want to try this extraordinary wasting spare time activity?
