## **Signal Processing and Linear Systems** B. P. Lathi

This text presents a comprehensive treatment of signal processing and linear systems suitable for juniors and seniors in electrical engineering. It is based on Lathi's widely used book, *Linear Systems and Signals*, with additional applications to communications, controls, and filtering as well as new chapters on analog and digital filters and digital signal processing. This volume's organization is different from the earlier book. Here, the Laplace transform follows Fourier, rather than the reverse; continuous-time and discrete-time systems are treated sequentially, rather than interwoven. Additionally, the text contains enough material in discrete-time systems to be used not only for a traditional course in signals and systems but also for an introductory course in digital signal processing.

In *Signal Processing and Linear Systems*, as in all his books, Lathi emphasizes the physical appreciation of concepts rather than the mere mathematical manipulation of symbols. Avoiding the tendency to treat engineering as a branch of applied mathematics, he uses mathematics not so much to prove an axiomatic theory as to enhance physical and intuitive understanding of concepts. Wherever possible, theoretical results are supported by carefully chosen examples and analogies, allowing students to intuitively discover meaning for themselves. An accompanying solutions manual is available on CD-ROM.

### From reader reviews:

#### **Anthony Harrison:**

Nowadays reading books are more than want or need but also get a life style. This reading routine give you lot of advantages. The advantages you got of course the knowledge even the information inside the book that will improve your knowledge and information. The data you get based on what kind of guide you read, if you want attract knowledge just go with education books but if you want feel happy read one with theme for entertaining including comic or novel. The Signal Processing and Linear Systems is kind of book which is giving the reader unpredictable experience.

#### **Paul McKinney:**

Reading a e-book can be one of a lot of task that everyone in the world loves. Do you like reading book therefore. There are a lot of reasons why people like it. First reading a publication will give you a lot of new details. When you read a publication you will get new information mainly because book is one of a number of ways to share the information or even their idea. Second, studying a book will make an individual more imaginative. When you reading through a book especially fictional book the author will bring that you imagine the story how the people do it anything. Third, you may share your knowledge to others. When you read this Signal Processing and Linear Systems, you could tells your family, friends and soon about yours guide. Your knowledge can inspire the mediocre, make them reading a publication.

#### **Joseph Jackson:**

A lot of people always spent their particular free time to vacation or perhaps go to the outside with them household or their friend. Did you know? Many a lot of people spent they will free time just watching TV, or playing video games all day long. If you would like try to find a new activity that is look different you can read a book. It is really fun for you. If you enjoy the book which you read you can spent the whole day to reading a reserve. The book Signal Processing and Linear Systems it doesn't matter what good to read. There are a lot of folks that recommended this book. These were enjoying reading this book. When you did not have enough space to deliver this book you can buy the e-book. You can m0ore effortlessly to read this book from the smart phone. The price is not too expensive but this book offers high quality.

#### **Daniel Caudle:**

You will get this Signal Processing and Linear Systems by browse the bookstore or Mall. Just viewing or reviewing it might to be your solve trouble if you get difficulties on your knowledge. Kinds of this publication are various. Not only by written or printed and also can you enjoy this book by means of e-book. In the modern era including now, you just looking because of your mobile phone and searching what your problem. Right now, choose your own ways to get more information about your reserve. It is most important to arrange yourself to make your knowledge are still change. Let's try to choose suitable ways for you.
