Cytochrome P450, Volume 206: Protein-Dna Interactions (Methods in Enzymology)

This volume represents the first collection of methodological approaches to P450 investigation which includes the use of molecular biological techniques. It is designed for use by those who study the P450 superfamily. Methods are presented for the identification and characterization of unique forms of P450 mRNA and protein, for expression of P450s in heterologous systems, for the study of human P450s, and for the characterization of P450s in different tissues.
